

I am a flight attendant for Northwest Airlines. I am very much against the use of cell phones while in the air. An aircraft is a very confined space, and noise is magnified while in flight for this reason. We have all been subjected to that person who relishes speaking loudly into their cell phone in the middle of a crowd. I'd be willing to bet that that person will be the one creating noise pollution at 30,000 feet making everyone around him irritable and annoyed. I can see the possibility of air rage because of this. We don't need it . Please no cell phones in the air!!!! Thanks for your attention.
